

MADE TO BE PLAYED

Our highly participatory music experience encourages the audience to jump in and enjoy. More than just a band; we represent a movement—communities united by the pursuit of global harmony. That's why we offer songbooks, so people join in and enjoy.

Drawing inspiration from artists like Devendra Banhart, Nick Mulvey, and Trevor Hall, Cosmic Butterflies infuse a high-vibe frequency with catchy melodies, touching lyrics, and astonishing instrumentation. The result is a soundscape that is both intricate, pleasant, and full of surprises.

The heart-thumping "Lover Songs" album features 12 tracks, capturing the essence of anticipation, attraction, and connection.

FAR OUT + HEARTFELT

Our songs are open doors, with paths to explore. We offer variety, blending the excited allure of Psychedelic Rock with the earthy warmth of Folk, creating an experience we call "Folkadelic!" A prominent flute weaves, like magic threads, through acoustic and electric instrumentation.

We showcase a wide range of sounds, from the glissando of a concert harp to the soul-stirring waves of a cello. You'll hear a funky skank guitar in "The Voice," a choir of celestial voices in "Home," whispers in "Sparkles," and a fiddle in "Close To You." Each song is a three-way dance between body, heart, and mind.

The music video for our song, "Dancing Constellation," features 40 dancers embodying the stars they are.

MUSIC FOR A FEEL-GOOD ADVENTURE

Fly into the wild meadows of Cosmic Butterflies. Here, the soundtrack is something more than a melody with a message—it's a journey. Consider our tunes as the backdrop for your road trip, nature walk, campfire, or yoga session.

"Colors Flying" (2021) is our ethereal debut album.

“VIBRANT + SPARKLY”

Thank you for considering the energizing music of Cosmic Butterflies. We are thrilled to carry the songs of love's multi-dimensions. Sharing these jewels is our focus in life, and it is an honor.
